Adding Library resources to your online course is as easy as one, two, three!

1. Go to your course in Canvas and select Settings.
2. Select the Navigation tab under Settings.
3. Add Auraria Library to your course menu by mousing over the section and dragging it to the active area of your course.

When your students select Auraria Library from your course menu, they will see a page with Auraria Library’s Start My Research search box and the 24/7 Online Chat.
